

RAVAK introduces slim-edge bathtubs

The most popular models of RAVAK bathtubs follow a minimalist approach to design with their shape and, newly, also with a thinned edge. A slim edge that is only 18 mm thick best shows its potential when embedded in a surround. It blends in perfectly, creating a uniform appearance without any visible transitions, allowing it to harmoniously match the design of the entire bathroom. The surround can be made from many different materials and in many different designs and also provides the useful option of storing items around the edges.

RAVAK offers the following slim-edge rectangular bathtubs: City Slim 180 x 80 cm, Formy 01 Slim 170 x 75 cm and 180 x 80 cm and Formy 02 Slim 180 x 80 cm, Chrome Slim 170 x 75 cm and 150/160x70 cm.
