

## RAVAK Guarantees Quality

As the last year of the third decade of its existence approaches, RAVAK is introducing extra-extended quality guarantees for its product portfolio. Thanks to the fact that it runs its own production processes and technologies, which have a largely local character, RAVAK has full control of the entire production process, and so customers can really rely on the quality of its production.

A ten-year warranty on all **RAVAK baths** is guaranteed if the buyer uses original RAVAK supports (legs) for the given type of bath in accordance with the assembly manual.

Customers are also offered a full ten-year guarantee on the superb AntiBlock sliding door closing and opening system, embedded into the Supernova shower enclosures. The AntiBlock system ensures trouble-free and quiet door movement and RAVAK tests it for a minimum service life of 1,000,000 opening cycles. All our **shower enclosures and doors** are covered by an extra five-year guarantee. The floor solution inside the shower enclosures offers a five-year guarantee on shower trays made of cast marble, and a 25-year guarantee on stainless shower drains.

All **washbasins, regardless of the material**, i.e. ceramic, cast marble and also the “slim” design, have a five-year guarantee. The same period applies to bathroom furniture – RAVAK even provides a lifetime warranty on metal runners.

**Faucets** are one of the most intensively used components in bathrooms and kitchens. Nevertheless, RAVAK is so confident of the quality of its products that it provides a five-year guarantee (except for Suzan series faucets).

A ten-year warranty also applies to **toilets, bidets and modules embedded into walls**.

Thanks to a rich product range and smart designs, we offer solutions for the entire bathroom, including professional guidance and servicing. Our products are customer-oriented in all respects and provide first-class quality and all certifications, thanks to which we can also offer extended guarantee periods.
