

## The most reliable RAVAK shower enclosure now revamped

**RAVAK presents an innovation of its best-selling Supernova shower enclosure. The most durable RAVAK shower enclosure boasts a revamped design, featuring a trendy black frame.**

Like a star, the Supernova shower enclosure has been shining in the RAVAK product range for almost 30 years. Millions of units sold are used not only in households, but also in heavy-duty commercial operations, such as hotels or fitness centres. Supernova has gained popularity for its totally reliable sliding system, stable frame and exceptional array of component combinations. The model line offers a wide range of dimensions, fillings and frame finishes as well as several types of door closing systems (sliding, folding, pivoting). The best known are the sliding doors of the Supernova shower enclosures, which not only save space in the bathroom, but also eliminate all risks of jamming and misalignment of the sliding sections thanks to the AntiBlock patent. At RAVAK, they are tested for a million openings and closings, and we are proud to provide a ten-year warranty on the functionality of the AntiBlock sliding system as a token of trouble-free and quiet operation.

In 2021, the market will see Supernova shower enclosures with their frame height increased by 10 cm and in matt black. The innovative design goes hand in hand with the trend of slimmer lines in the bathroom, which the Supernova shower enclosures further underline by a contrasting colour.

The Supernova shower enclosures are crafted in the Czech Republic, directly in the RAVAK production facility. The customer may thus rest assured of fully controlled product quality and trouble-free delivery at all times. The Supernova shower enclosures are the only product in the RAVAK range that is delivered assembled; all they require is to be screwed and sealed in the bathroom.
